

CHECKLIST ENVIRONMENTAL ASSESSMENT

Project Name: Installing a buried distribution power line

Proposed Implementation Date: 2012

Proponent: Big Flat Electric Cooperative Incorporated, Malta, Montana 59538

Type and Purpose of Action: Big Flat Electric Cooperative Incorporated has made a Right of Way Easement Application to the Glasgow Unit Office to install a new buried power line that will be located on State land in Phillips County. The buried power line is for the American Prairie Reserve Safari Camp that will be built near the Reynolds Hill county road in south Phillips County. The power from this line will be used in various types of structures for tourist from around the world who will stay and recreate on American Prairie Reserve lands and Federal lands. The power line was installed in 2012 under a construction license granted by Department of Natural Resources and Conservation, Helena Office.

Location: E2, Section 36 Township 24 North Range 31 East ,

County: Phillips

I. PROJECT DEVELOPMENT

1. PUBLIC INVOLVEMENT, AGENCIES, GROUPS OR INDIVIDUALS CONTACTED: Provide a brief chronology of the scoping and ongoing involvement for this project.

Big Flat Electric Cooperative Incorporated has made a Right of Way Easement Application and submitted it to the Department of Natural Resources and Conservation, Glasgow Unit Office along with the survey plats for those State land tracts that will be crossed by this project. The purpose of the requests is to place new buried power lines as part of a new power line project. The buried power line will be placed in a manner as to not interfere with the lessee's surface activities. Also, the surface lessee's have been contacted by Big Flat Electric Cooperative Incorporated in order for lessees to sign Department of Natural Resources and Conservation, Notice of Settlement of Damages Form. There are no surface damages anticipated.

2. OTHER GOVERNMENTAL AGENCIES WITH JURISDICTION, LIST OF PERMITS NEEDED:

Phillips County Commissioners, United States Department of Agriculture, Farm Service Agency. United States Department of Interior, Bureau of Land Management

3. ALTERNATIVES CONSIDERED:

Action Alternative: Grant Right of Way Easement to Big Flat Electric Cooperative Incorporated to place a new buried underground power line on State owned land.

No Action Alternative: Deny a Right of Way Easement requested by Big Flat Electrical Cooperative Incorporated to place new buried underground power line on State owned land.

II. IMPACTS ON THE PHYSICAL ENVIRONMENT

RESOURCE

POTENTIAL IMPACTS

II. IMPACTS ON THE PHYSICAL ENVIRONMENT

<p>4. GEOLOGY AND SOIL QUALITY, STABILITY AND MOISTURE:</p> <p>Are fragile, compactable or unstable soils present? Are there unusual geologic features? Are there special reclamation considerations?</p>	<p>General Discussion: Very minimal native rangeland, acreage will be impacted by this activity. There are no fragile, compactable, or unstable soils present or any unusual geologic features. The various soil types will continue to produce native vegetation upon project completion.</p> <p>Action: This disturbance caused by the installation of the buried power line cable will be done using heavy trenching equipment for a short time period. There will be minimal compaction to the various soil types by the equipment</p> <p>No Action: No impacts to the geology or soil characteristics will occur.</p>
<p>5. WATER QUALITY, QUANTITY AND DISTRIBUTION: Are important surface or groundwater resources present? Is there potential for violation of ambient water quality standards, drinking water maximum contaminant levels, or degradation of water quality?</p>	<p>General Discussion: There is one ephemeral creek identified as Telegraph Creek that will be located in the path of the project. The creek is not located on the State land. A trenching machine will go through the creek and the buried power line will not impact surface water activities.</p> <p>Action: No impacts to the water quality, quantity, and/or distribution of surface and ground water resources on the State land. The electric power line will be installed with a trenching machine with minimal surface disturbance on a 40 foot wide construction area.</p> <p>No Action: No impacts to the water quality, quantity, and/or distribution will occur.</p>
<p>6. AIR QUALITY: Will pollutants or particulate be produced? Is the project influenced by air quality regulations or zones (Class I airshed)?</p>	<p>General Discussion: The project area is not located in an air quality regulation zone or airshed.</p> <p>Action: The air quality may or may not be temporarily reduced during installation. Small amounts of pollutants from machinery and particulates from the disturbance of the areas soil may be produced. The possible reduction in air quality will be minimal and will quickly return to normal by natural means.</p> <p>No Action: No impacts to the air quality will occur.</p>
<p>7. VEGETATION COVER, QUANTITY AND QUALITY: Will vegetative communities be permanently altered? Are any rare plants or cover types present?</p>	<p>General Discussion: No rare plants or cover types are present within the project area. The project will occur in the spring or summer and minimal vegetation will be disturbed by the installation of the buried power line.</p> <p>Action: The plant communities were in the mid to late stages of growth when installation occurred. The impacts to plant growth will be minimal and areas will see plant regeneration from exiting seed sources.</p> <p>No Action: No impacts to the vegetation cover,</p>

II. IMPACTS ON THE PHYSICAL ENVIRONMENT

quantity, and/or quality will occur.

8. TERRESTRIAL, AVIAN AND AQUATIC LIFE AND HABITATS:

Is there substantial use of the area by important wildlife, birds or fish?

General Discussion: This affected area is small in nature and located in a rural area. The area of impact has some habitat types for Sage grouse, song birds, sharp-tail grouse, pronghorn antelope, mule deer, various raptors and elk. There may also be some small areas that have small prairie potholes with habitat for some waterfowl types.

Action: Impacts to terrestrial, avian, and aquatic habitat sources will be minimal to none. Area has minimal aquatic habitat on or near the project site. There are no expected impacts to the aquatic habitat associated with the surface water resources on surrounding deeded lands.

No Action: No impacts to terrestrial, avian, and/or aquatic life and habitats will occur.

9. UNIQUE, ENDANGERED, FRAGILE OR LIMITED

ENVIRONMENTAL RESOURCES: Are any federally listed threatened or endangered species or identified habitat present? Any wetlands? Sensitive Species or Species of special concern?

General Discussion: A search of the Montana Natural Resource Inventory Survey system found the following species of concern to be present within the proposed action areas: Black tailed prairie dog, Burrowing owl, greater sage grouse, mountain plover and milk snake.

Action: It is anticipated that the implementation of this action will not affect any known unique, endangered, fragile, or limited environmental resources. The project will have very minimal impacts to species of concern.

No Action: No impacts to unique, endangered, fragile, or limited environmental resources will occur.

10. HISTORICAL AND ARCHAEOLOGICAL SITES: Are any historical, archaeological or paleontological resources present?

General Discussion: Montana Department of Natural Resources and Conservation has inspected the State land to be impacted through the Field Evaluation process. Aberg Cultural Resource Consulting service conducted a Class III survey of the State land and surrounding lands: "One previously unknown cultural property (APR-4/24PH1037) was discovered during the Class III survey of the August 2012 APR Safari Camp new power line route. The site occurs on private and State of Montana land. The site consists of a cultural material scatter that includes quartzite artifacts, scattered heat-altered rocks, and one partially eroded hearth that contained charcoal. Although the site was not tested it appears that cultural deposits occur in the first 20cm below surface. Very good cutbank exposures present along the site landform revealed about 2.5 meters of sediments and deeply buried cultural deposits were not apparent in these exposures in August of 2012. In the absence of formal subsurface testing, a determination of National Register eligibility was not made for the site documented in August. Attached to EA is a copy of survey results.

Action: There is no need for action on tract as the cultural site was not impacted by the moving of the

II. IMPACTS ON THE PHYSICAL ENVIRONMENT

	<p>buried power line location.</p> <p>No Action: No impacts to the areas historical, archeological, and/or paleontological resources will occur.</p>
11.AESTHETICS: Is the project on a prominent topographic feature? Will it be visible from populated or scenic areas? Will there be excessive noise or light?	<p>General Discussion: The project areas are located in a rural area. The landscape consists of rolling to hilly terrain. Portions of the project are located next to a county road and will be visible to the local population.</p> <p>Action: The area is native rangeland acreage. No long term impacts to the areas aesthetics are anticipated. The power line will be buried underground and the line will not interfere with the areas aesthetics. Increases of noise and light will occur during construction; these impacts will be eliminated as soon as the project is completed.</p> <p>No Action: No impacts to the areas aesthetics will occur.</p>
12.DEMANDS ON ENVIRONMENTAL RESOURCES OF LAND, WATER, AIR OR ENERGY: Will the project use resources that are limited in the area? Are there other activities nearby that will affect the project?	<p>General Discussion: The area does not contain limited resources. Nearby activities consist mostly of general ranching operations and American Prairie Reserve buffalo viewing area.</p> <p>Action: No impacts to the demands of environmental resources such as land, water, air, and/or energy resources are anticipated.</p> <p>No Action: No impacts to the demands of environmental resources such as land, water, air, and/or energy resources will occur.</p>
13.OTHER ENVIRONMENTAL DOCUMENTS PERTINENT TO THE AREA: Are there other studies, plans or projects on this tract?	<p>General Discussion: The writer of this document is not aware of other environmental documents pertinent to the project area, other than those listed in this document.</p> <p>Action: No impacts to studies, plans, and/or projects pertinent to this area are anticipated to occur.</p> <p>No Action: No impacts to studies, plans, and/or projects are anticipated to occur.</p>

III. IMPACTS ON THE HUMAN POPULATION

RESOURCE	POTENTIAL IMPACTS AND MITIGATION MEASURES
14. HUMAN HEALTH AND SAFETY: Will this project add to health and safety risks in the area?	<p>General Discussion: The proposed project will create human health and/or safety risks associated with the installation and maintenance of the power line. The</p>

II. IMPACTS ON THE PHYSICAL ENVIRONMENT

	<p>area is sparsely populated and risks from working in a rural area are minimal.</p> <p>Action: The employer and employee identify these risks as occupational hazards. These risks will only be present during installation and maintenance of the proposed power line. There will be mitigation of health and safety risks by using trained professionals with proper safety efforts.</p> <p>No Action: No impacts to human health and/or safety risks will occur.</p>
15. INDUSTRIAL, COMMERCIAL AND AGRICULTURAL ACTIVITIES AND PRODUCTION: Will the project add to or alter these activities?	<p>General Discussion: The surface lessees will have no decreased revenues due to surface disturbance caused by the installation of the overhead electrical lines.</p> <p>Action: There will be no need for mitigation for the power line installation. Activities were done in late summer early fall with minimal impacts affecting growing grass plant production.</p> <p>No Action: No impacts will occur on the local agricultural activities in the area.</p>
16. QUANTITY AND DISTRIBUTION OF EMPLOYMENT: Will the project create, move or eliminate jobs? If so, estimated number.	<p>Action: Because the project will be completed in a relatively short time frame, no impacts to quantity and distribution of employment are anticipated. Big Flat Electric Cooperative Incorporated has permanent employees that will complete the power line construction.</p> <p>No Action: No impacts to quantity and distribution of employment will occur.</p>
17. LOCAL AND STATE TAX BASE AND TAX REVENUES: Will the project create or eliminate tax revenue?	<p>Action: The granting of the Right of Way Easement for the project will increase the county tax base by adding infrastructure.</p> <p>No Action: No impacts to the state tax base and/or tax revenues will occur.</p>
18. DEMAND FOR GOVERNMENT SERVICES: Will substantial traffic be added to existing roads? Will other services (fire protection, police, schools, etc) be needed?	<p>General Discussion: The area receives minimal traffic during most of the year due to low population levels. Slight increases in traffic occur during time periods with increased ranching activities, and various types of recreational use.</p> <p>Action: Increases in traffic levels will occur during installation. The increased traffic is not anticipated to occur at substantial levels. No impacts to government services are anticipated.</p> <p>No Action: No impacts to the level of demand for road use or government services will occur.</p>
19. LOCALLY ADOPTED ENVIRONMENTAL PLANS AND GOALS: Are there State, County, City, USFS, BLM,	<p>General Discussion: There are no known zoning or</p>

II. IMPACTS ON THE PHYSICAL ENVIRONMENT

Tribal, etc. zoning or management plans in effect?	<p>management plans in affect in the construction areas.</p> <p>Action: No impacts to local environmental plans and goals are anticipated to occur as the construction is in remote areas.</p> <p>No Action: No impacts to local environmental plans and goals will occur.</p>
20. ACCESS TO AND QUALITY OF RECREATIONAL AND WILDERNESS ACTIVITIES: Are wilderness or recreational areas nearby or accessed through this tract? Is there recreational potential within the tract?	<p>General Discussion: This tract of State land is legally accessible from a county road and provides some recreational opportunities. No wilderness areas, wilderness study areas or areas of critical environmental concern are located within a close proximity to the proposed project area.</p> <p>Action: Portions of the proposed action area are located near an existing county road. The project area contains some recreational opportunities. No impacts to recreational quality or recreational opportunities are anticipated as project will be done in a short time frame.</p> <p>No Action: No impacts to the quality of recreational and wilderness activities will occur.</p>
21. DENSITY AND DISTRIBUTION OF POPULATION AND HOUSING: Will the project add to the population and require additional housing?	<p>Action: The service provided by the new buried power line may or may not increase the likelihood of future rural development in this area. No impacts to the density and/or distribution of population and housing are anticipated to occur.</p> <p>No Action: No impacts to the density and/or distribution of population and housing will occur.</p>
22. SOCIAL STRUCTURES AND MORES: Is some disruption of native or traditional lifestyles or communities possible?	<p>Action: No impacts to the areas social structures, native/traditional lifestyles, or communities are anticipated to occur.</p> <p>No Action: No impacts social structures, native/traditional lifestyles, or communities will occur.</p>
23. CULTURAL UNIQUENESS AND DIVERSITY: Will the action cause a shift in some unique quality of the area?	<p>Action: No impacts to the areas cultural uniqueness and/or diversity are anticipated to occur.</p> <p>No Action: No impacts to the areas cultural uniqueness and/or diversity will occur.</p>
24. OTHER APPROPRIATE SOCIAL AND ECONOMIC CIRCUMSTANCES:	<p>General Discussion: The project will provide the opportunity for local businesses to supply the applicant with materials needed for installation of the buried power line and to supply the material used for the line itself. This opportunity may or may not benefit local businesses.</p> <p>Action: The state trust will receive some monetary</p>

II. IMPACTS ON THE PHYSICAL ENVIRONMENT

compensation for the Right of Way Easement and the county will benefit from an increased tax base. Also, the American Prairie Reserve tourist activates will benefit from the additional electric power from the new line.

No Action: No impacts to the social and economic circumstances will occur and the state trust will not receive additional revenue from the Right of Way Easement.

IV. FINDING

25. ALTERNATIVE SELECTED:

Action Alternative: Recommend approving Right of Way Easement for this portion of Big Flat Electric Cooperative Incorporated buried power line installation.

26. SIGNIFICANCE OF POTENTIAL IMPACTS:

Short-term and small-scale impacts to the native rangeland resource located within proposed action area are expected. Archaeological sites were avoided and are not present within the project area. This project will benefit the school trust by generating additional revenue from the Right of Way Easement. Completion of the project will increase American Prairie Reserve Safari Camps ability to receive services from Big Flat Electric Cooperative Incorporated.
